JETTY ARMCHAIR

OUTDOOR FURNITURE

OUTDOOR BISTRO CHAIR The Jetty armchair combines a tubular metal frame with thin slats of iroko to form an ideal piece of outdoor restaurant furniture. Imbued with the toughness one would expect from an outdoor chair the Jetty carries itself with the elegance of a bistro chair. The frame can be finished in any standard RAL to add a splash of colour to a traditional piece of furniture. Jetty is an outdoor bistro chair developed on the classic typology of chairs for terraces of hotels and restaurants. The bent tube metal structure combined with wooden seat and backrest provides an optimal equilibrium of comfort and rigidity required in the demanding context of extensive use in exterior exposed to sun and seawater. The base is available in powder-coated, which is corrosion-free that significantly adds resistance for outdoor usage. Visit us to find out more about this Jetty Armchair at UHS International.
