

Concentrating primarily on abstract work to create ambience and an easy décor that is directly related to the diner/loungers' emotions, we can create canvas of any size, colour and style for you.

Art and food have always gone hand in hand. History tells us of artists such as Picasso and Matisse even paying for their suppers with paintings. And the enfant terrible of contemporary art, Damien Hirst, has compared great food to great art.

There is a natural symbiotic relationship that is comfortable and reassuring.

BE INSPIRED

Through our links to the hospitality sector and extensive research by a team of analysts, we know that diners respond to different colours, themes and styles in different, highly emotive ways.

Colour psychology is a prominent factor, with some colours playing subtly on prime emotions so much as to affect appetite, time perception, stimulation of body and mind, and energy levels - not to mention the way in which it can enhance and compliment the overall décor of a space.

We wanted to create a simple way for designers and restaurant owners to commission original artworks that linked directly to their interior vision. And we have. We simply find out what you want, and our dedicated art team creates unique artwork to your specifications.

STEPS TO COMMISSION ARTWORK

1.

A member of the team will correspond with the designer/visionary by either email, phone or face to face, to ascertain specifics such as quantities, sizes, themes, colours, styles, inspirations, etc.

2.

We will then prepare a quote, plus a few samples and options for you, to ensure we are headed on the right path. All consultation is entirely FOC.

3.

As soon as we know we are on the same wavelength, we create your unique masterpieces!
